ABOUT US

At Grand Trading Company, we are a trusted trading company based in Saudi Arabia , dedicated to supplying high-quality hand tools, power tools, safety equipment, electrical components, and plumbing materials to meet the demands of construction, industrial, and maintenance sectors. With a strong commitment to reliability, durability, and customer satisfaction, we partner with leading global and local brands to ensure our clients receive the best-in-class products at competitive prices.

Our comprehensive product range includes everything from precision hand tools and heavy-duty power tools to essential personal protective equipment (PPE), wiring accessories, lighting, pipe fittings, and plumbing fixtures. We serve contractors, electricians, plumbers, facility managers, and retailers, offering efficient service and expert product knowledge.

VISION

To be the leading and most trusted provider of high-quality tools, safety equipment, electrical, and plumbing solutions—empowering professionals across industries with reliable products, innovative solutions, and exceptional service that drive progress, safety, and efficiency.

MISSION

Our mission is to deliver top-quality hand tools, power tools, safety equipment, electrical components, and plumbing materials that meet the highest standards of performance and reliability. We aim to support our customers across construction, industrial, and maintenance sectors by offering exceptional service, expert guidance, and timely supply solutions. Through continuous improvement, strategic partnerships, and a commitment to excellence, we strive to be the go-to source for all professional-grade tools and supplies.

Fasteners
that are industry
acknowledged

Bolt / Screw

Bolts belong to the family of fastener which has three parts- head, chamfer, and a shaft. Materials and objects are positioned using a variety of bolts. A nut is used along with a bolt to secure the objects at a position. Sometimes bolts are called screws as both of them share similar characteristics and differentiating them is complex. In simple terms, a material is fixed together by passing a bolt through it whereas screws fit directly.

Nut

A nut is a type of fastener with a threaded hole. Nuts are almost always used in conjunction with a mating bolt to fasten multiple parts together. The two partners are kept together by a combination of their threads' friction (with slight elastic deformation), a slight stretching of the bolt, and compression of the parts to be held together.

Washer

A washer is a thin plate (typically disk-shaped, but sometimes square) with a hole (typically in the middle) that is normally used to distribute the load of a threaded fastener, such as a bolt or nut. Other uses are as a spacer, spring (Belleville washer, wave washer), wear pad, preload indicating device, locking device, and to reduce vibration (rubber washer). Washers often have an outer diameter (OD) about twice their inner diameter (ID), but this can vary quite widely.

Socket Screw

A socket cap screw, also known as a socket head cap screw, socket screw, or Allen bolt, is a type of cap screw with a cylindrical head and hexagonal drive hole. The term socket head cap screw typically refers to a type of threaded fastener whose head diameter is nominally 1.5 times that of the screw shank (major) diameter, with a head height equal to the shank diameter.

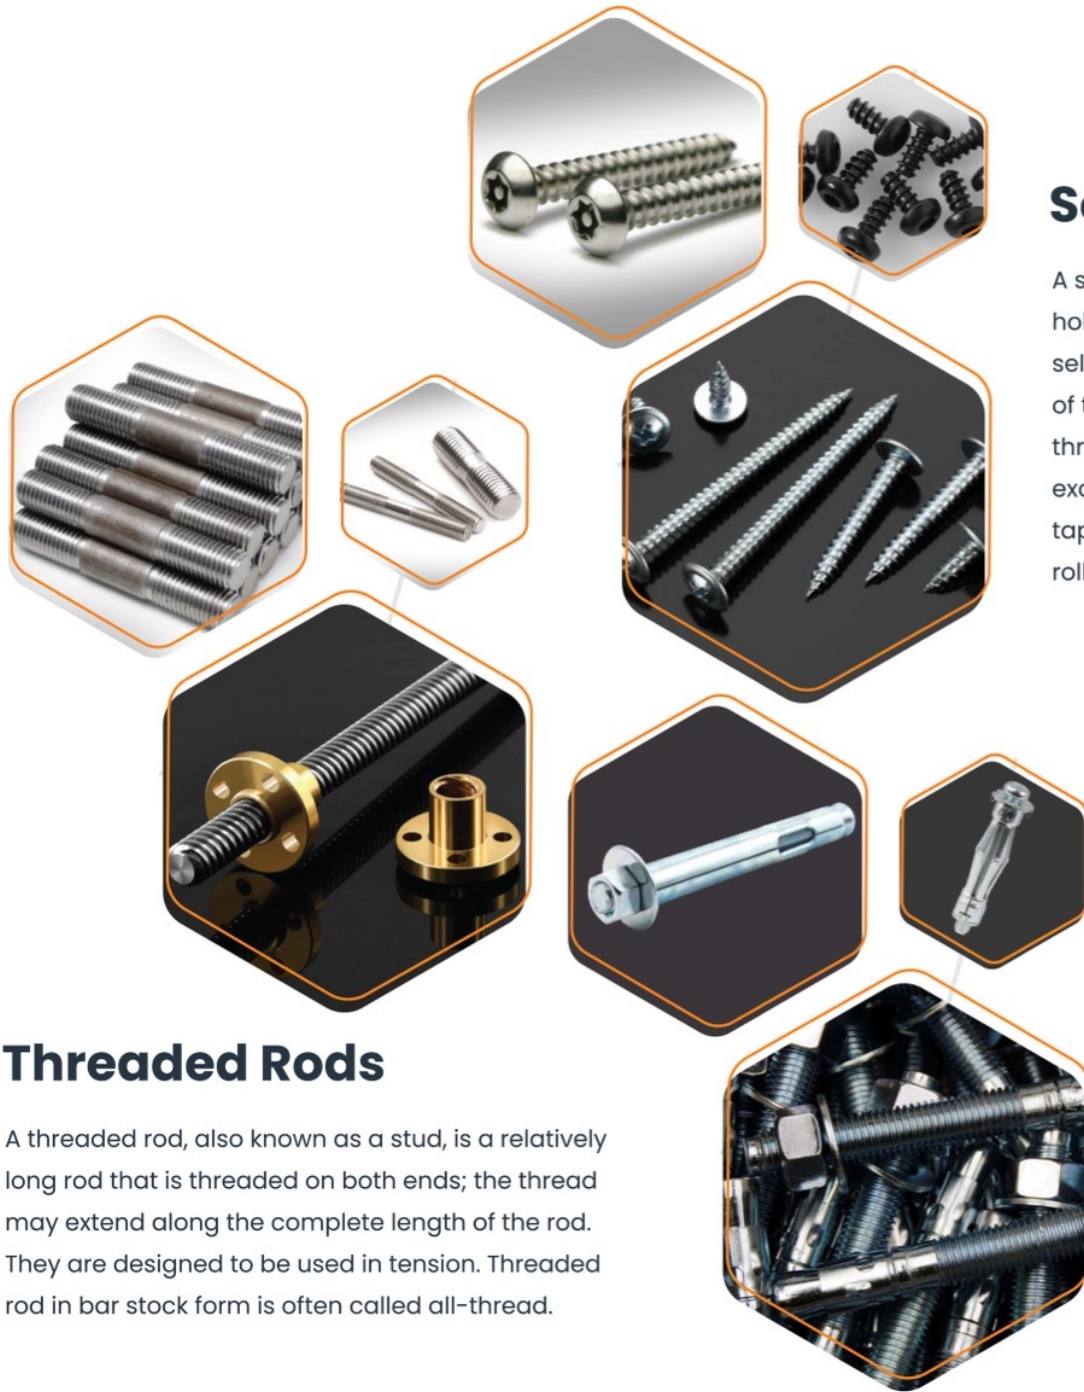

Machine Screw

A machine screw is generally a smaller fastener (less than 1/4 inch (6.35 mm) in diameter) threaded the entire length of its shank that usually has a recessed drive type. Machine screws are also made with socket heads, in which case they may be referred to as socket head machine screws.

Threaded Rods

A threaded rod, also known as a stud, is a relatively long rod that is threaded on both ends; the thread may extend along the complete length of the rod. They are designed to be used in tension. Threaded rod in bar stock form is often called all-thread.

Self Tapping Screw

A self-tapping screw is a screw that can tap its own hole as it is driven into the material. More narrowly, self-tapping is used only to describe a specific type of thread-cutting screw intended to produce a thread in relatively soft material or sheet materials, excluding wood screws. Other specific types of self-tapping screw include self-drilling screws and thread rolling screws.

Anchor Fasteners

Anchor bolts are used to connect structural and non-structural elements to concrete. The connection can be made by a variety of different components: anchor bolts (also named fasteners), steel plates, or stiffeners. Anchor bolts transfer different types of load: tension forces and shear forces.

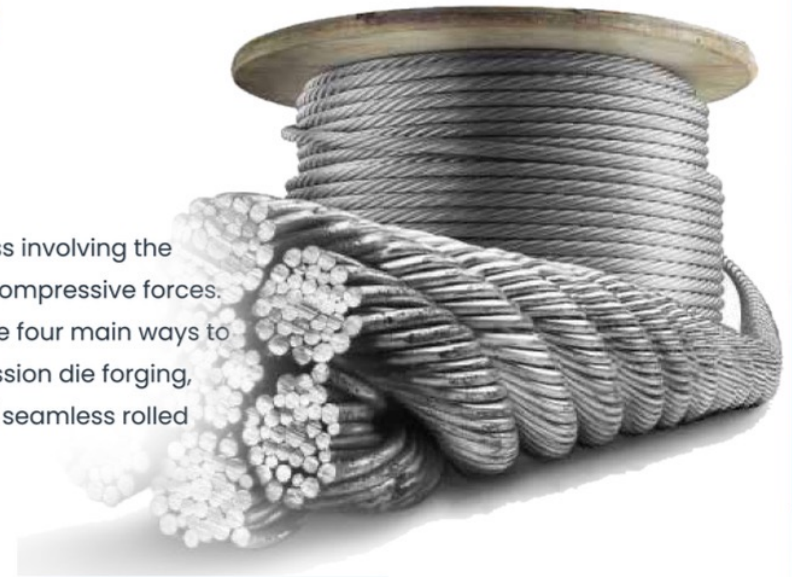

Anchors

Anchors get their name because they serve a similar function to a boat's anchor, which embeds itself in the seabed to keep a ship from moving. Generally, people use these fasteners to connect something to a material like drywall or concrete. They embed themselves in the material and hold the object you're affixing in place.

Forgings

Forging is a manufacturing process involving the shaping of metal using localized compressive forces. When it comes to forging, there are four main ways to forge a part. Those four are impression die forging, cold forging, open die forging and seamless rolled ring forging.

ASTM A193 SPECIFICATION

ASTM A193 Specification for high tensile alloy and stainless-steel bolts including most popular grade B5, B6, B7, B7M, B8, B8M, B8T, B16, etc.

ASTM A193 specification covers high tensile alloy and stainless-steel fasteners for pressure vessels, valves, flanges, and fittings for high temperature or high-pressure service, or other special purpose bolting applications. Several grades are covered, including ferritic steels and austenitic stainless-steel designated B5, B6, B7, B8, B8M, etc.

PROTECTION & DISTRIBUTION EQUIPMENT

Earthing & Grounding Equipment & Accessories
Circuit Breakers & Accessories
load Centers
Capacitors & Capacitor Bank Component
Isolators
Changeover Switches
Safety Switch
Busbar
Other protection & distribution

CABLE MANAGEMENT SYSTEMS

Cable Trunking, Ducts And Fittings
Cable Trays, Cable Ladders and Fittings
Channels and Fittings
Underfloor Trunks And Accessories
Conduits and Fittings
Boxes and Accessories
Enclosures and Cabinets

WIRING DEVICES & ACCESSORIES

Wiring Devices And Accessories
Industrial Plugs And Sockets
Hazardous - Plugs & Sockets

WIRES, CABLES & ACCESSORIES

Cables
Wires

SAFETY PRODUCTS

- FR Coverall
- Safety Shoes
- Boiler Suits Full/Half Sleeves
- Helmets, Bump caps
- Disposable Coveralls
- Respirators
- Spectacles - Clear, Grey, Green, 1/0
- Goggles - Antifog & Dust
- Gloves
- Gum boots - Ordinary & Safety
- Rain Suits
- Ear Plugs / Ear Muffs
- Gas Detectors - Portable, Fixed
- Traffic Cones, Traffic Bollard, Traffic Baton
- Reflective Jackets, Winter Jackets
- Warming Tapes/Lights
- SCBA (Self-Contained Breathing Apparatus)
- First Aid Kits
- Doctor's Coats
- Plastic Chains & Warning tapes
- Lockout Stations and Safety Padlocks

FIRE EQUIPMENTS

- Fire Hoses
- Hydrants
- Nozzles
- Fittings
- Branch Pipes
- Monitors
- Fire Suits
- Fire Helmets
- Fire Boots
- Extinguishers
- Thermal Imagers
- Hydraulic Rescue Tools
- Alarm and Warning Equipment
